<i>HTML5</i>	<i>HTTP Requests</i>	<i>REST APIs</i>	<i>Postman</i>
<i>Photoshop</i>	<i>Agile</i>	<i>Wordpress</i>	<i>NPM</i>

Projects:

*Ijams Photo Storefront*

- Currently in progress
- The website will be a place where I can sell and display my personal film photography
- Being built with React on the front-end, Node.js and Express on the back-end, and Stripe to accept payments

*Vagabond Travel App*

- Users can create an account to log the landmarks they encounter while travelling, they can also find new landmarks they might want to check out
- A full-stack CRUD application built with Express, Sequelize, Node.js, Angular, Typescript, and PostgreSQL
- Implements database associations and admin functionality

- Team project using Git version control
- Deployed to Heroku  
<https://vagabond-client-mi.herokuapp.com/home>

#### *Graffiti Finder App*

- A full-stack CRUD application built with Express, Sequelize, Node.js, React.js, and PostgreSQL
- Users can enter a location, photo, and description of cool street art so that fellow users can find it too
- Implemented Google Maps API
- Deployed using Heroku  
<https://graffiti-app-client.herokuapp.com/>

#### *Studio Ghibli API*

- An API that returns a random movie result with the click of a button, telling you which film to see next
- Implemented using Javascript, HTML, CSS, and fetched data from a third party API
- Deployed using Firebase  
<https://random-ghibli-api.firebaseio.com/>

#### *Personal Portfolio Webpage*

- Personal portfolio built with HTML Bootstrap and CSS  
<https://maddiejams.github.io/>

#### *Giphy API*

- An independent React.js project built to test my skills
- Fetches data from the Giphy API
- You can search for any GIF and the app will return your results  
<https://github.com/maddiejams/giphyAPI>

#### *Giphy API Angular*

- An independent Angular project I built to test my skills in Angular
- Implements a fetch from the Giphy API to return search results  
<https://github.com/maddiejams/Giphy-API-Angular>

#### *JavaScript Tutorial Webpage*

- My first webpage
- Gives you a tutorial on the fundamentals of JavaScript
- Built with HTML and CSS  
<https://maddiejams.github.io/webpageProject/>

#### Professional Experience:

##### *Freelance Web Developer, Jackson Sky Web Design and Development, Apr 2019-Present*

- Convert photoshop wireframes into HTML/CSS documents
- Update existing Wordpress websites
- Stay accountable and track my time for each project

##### *Head Chef, The Patachou Foundation, Indianapolis, IN, Aug 2017-January 2019*

- Responsible for overseeing the entire process of serving 1000+ meals per week to kids through the IPS school system.
- Included creating and cost analyzing recipes, interacting with volunteers on a daily basis, managing employees and interns, entering all invoices, maintaining organization of supplies
- Worked on a small team of seven people
- Implemented and standardized new practices, including a database of 25+ new recipes
