## Objective

Self-motivated Chef turned JavaScript Bootcamp Student turned Freelance Web Developer, seeking to deliver my skills with full-stack JavaScript, React, Angular, and Node.js as a Software Engineer. Excited to make software that makes lives easier for humans.

## Education

*Eleven Fifty Academy, Fishers, IN*  
January 2019-March 2019

- Graduate of the JavaScript Bootcamp
- 700+ hours of hands on coding experience
- Completed 5 major projects in 12 weeks
- Received the Core Value Award for Integrity

## Competencies

- Working closely with a team
- Ability to sell a product to a client
- Active communicator
- Collaborative mindset
- Empathetic perspective
- Desire to learn and improve
- Detail oriented
- Customer Service
- Passion for the work
- Writing skills
- Problem solving
- Adaptability
- Comfortable with uncertainty
- Work well under pressure

## Technical Skills

<i>JavaScript</i>	<i>Bootstrap</i>	<i>PostgreSQL</i>	<i>Heroku Deployment</i>
<i>ES6</i>	<i>Angular Material</i>	<i>React</i>	<i>Firebase Deployment</i>
<i>CSS3</i>	<i>TypeScript</i>	<i>Angular</i>	<i>Git Version Control</i>
<i>Node.js</i>	<i>Express</i>	<i>Sequelize</i>	<i>Fetch Requests</i>
<i>HTML5</i>	<i>JSON</i>	<i>REST APIs</i>	<i>Postman</i>
<i>Photoshop</i>	<i>Agile</i>	<i>Wordpress</i>	<i>NPM</i>

## Projects

### *Graffiti Finder App*

- A full-stack CRUD application built with Express, Sequelize, Node.js, React.js, and PostgreSQL
- Users can enter a location, photo, and description of cool street art so that fellow users can find it too
- Utilized Bcrypt and Json Web Token to implement login functionality and user validation
- Tested my API endpoints with Postman

- Implemented Google Maps API with an NPM package
- Incorporated Bootstrap modals extensively, which demanded a solid understanding of state and how to pass props through components
- Utilized JavaScript ES6 extensively, including fetches and ternaries
- Fetched JSON data from the RESTful API that I built on the server
- Designed a custom logo in Photoshop and utilized custom fonts and CSS
- Deployed using Heroku

<https://graffiti-app-client.herokuapp.com/>

#### *Vagabond Travel App*

- Users can create an account to log the landmarks they encounter while travelling, they can also find new landmarks they might want to check out
- A full-stack CRUD application built with Express, Sequelize, Node.js, Angular, Typescript, and PostgreSQL
- Implements database associations and admin functionality
- Team project using Git version control - extensive experience with merging pull requests
- Organized the entire file structure of the front-end
- Built out the majority of our services for the client - utilized Angular HttpClient and Injectables
- Implemented GET, PUT, POST, DELETE functionality, which was then reused by fellow teammates for their components
- Designed the layout and feel of the site using Angular Material and custom CSS
- Acted as the team leader and delegated responsibilities, as well as facilitating daily standups
- Deployed using Heroku

<https://vagabond-client-mi.herokuapp.com/home>

#### *Studio Ghibli API*

- An API that returns a random movie result with the click of a button, telling you which film to see next
- Utilized essential JavaScript functions like Math.random and Math.floor
- Implemented using Javascript, HTML, CSS, and fetched data from a third party API
- Deployed using Firebase

<https://random-ghibli-api.firebaseio.com/>

### **Professional Experience**

#### *Freelance Web Developer, Jackson Sky Web Design and Development, Apr 2019-Present*

- Convert photoshop wireframes into HTML/CSS documents
- Update existing Wordpress websites
- Add content to sites and format in HTML
- Maintain communication via email with my supervisors
- Implement a work schedule and maintain it in order to meet deadlines

#### *Head Chef, The Patachou Foundation, Indianapolis, IN, Aug 2017-January 2019*

- Served 1000+ meals per week to kids through the IPS school system.
- Included creating and cost analyzing recipes, interacting with volunteers on a daily basis, managing employees and interns, entering all invoices, maintaining organization of supplies
- Worked on a small team of seven people
- Created, standardized, and cost-analyzed a "Food Bible" of 25+ new recipes
- Standardized volunteer pickup protocols
- Created and maintained an Excel ordering guide for our entire inventory
